DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-14, 16-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's independent claim 1 is drawn to a telecommunications device comprising, a-positioning controller adapted to determine positioning information for the telecommunications device, wherein the positioning information generally corresponds to a location Of a first user of the telecommunication device, and a wireless communications controller adapted to receive the positioning information from the positioning controller, to transmit the positioning information to a second user monitoring the telecommunications device, the second user defining a boundary condition for the telecommunication device, to cause an audible alarm to be generated if the telecommunications device is determined to be beyond the boundary condition, wherein the boundary condition comprises a warning boundary condition, the warning boundary condition including a start and threshold boundary condition, wherein the audible alarm having a first volume is generated if the telecommunications device is determined to be beyond the start boundary condition of the warning boundary condition and increases to a maximum volume when the threshold boundary condition is reached. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Applicant's independent claim 9 is drawn to a telecommunications system comprising, a wireless device including a positioning controller and a communications

controller, wherein the positioning controller, is adapted to determine positioning information for the wireless device which generally corresponds to a location of a first user of the wireless device, the wireless device is adapted to receive the positioning information from the positioning controller, to transmit the positioning information to a second user monitoring the telecommunications device, the second user defining a boundary condition so that the telecommunications device is not beyond the boundary condition defined by the second user, and to cause an audible warning to be generated if the telecommunications device is determined to be beyond the boundary condition, wherein the boundary condition comprises a warning boundary condition, the warning boundary condition including a start and threshold boundary condition, wherein the audible warning having a first volume is generated if the telecommunications device is determined to be beyond the start boundary condition of the warning boundary condition and increases to a maximum volume when the threshold boundary condition is reached, and an administrative device for receiving the positioning information for the second user. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Applicant's independent claim 14 is drawn to a telecommunications method comprising, providing a wireless device which includes a positioning controller adapted to determine positioning information for the wireless device, wherein the positioning information generally corresponds to a location of a first user of the wireless device, programming the wireless device with a boundary condition defined by a second user monitoring the wireless device, transmitting the positioning information to the second

user, generating an audible warning if the wireless device is determined to be beyond the boundary condition, wherein the boundary condition comprises a warning boundary condition, the warning boundary condition including a start and threshold boundary condition, and generating the audible warning having a first volume if the wireless device is determined to be beyond the start boundary condition of the warning boundary condition and increases to a maximum volume when the threshold boundary condition is reached. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
